

"I have had a couple of emergency service calls to *Dyral Sepp Enterprises*. On one, our main waterline to our house broke in the middle of winter. Dyral responded immediately. I was distressed to find out that the whole front lawn had to be dug up to run a new line. Not only did Dyral get the job done in one day, I was delighted to see the lawn was intact with just a 2-foot wide line of dirt running from the house to the road. I was amazed that all of that digging could do so little damage. It was easy to plant grass in that area and my lawn now looks as good as before.

"The second emergency call was a septic backup. The septic tank line from the house had to be located where it entered the tank. Dyral found the problem with very little damage to the yard again and had it fixed quickly and beyond my expectations as far as the look of my yard following the job. I highly recommend Dyral for being quick and of excellent quality."
